### Adopt-A-Block Annual Earth Day Event!

#### Mark Your Calendars!

Adopt-A-Blocks' Annual Earth Day Event!

April 19th, 2008  
10:00 AM

At Centennial Park

Mission Adopt-A-Block invites everyone to come out and join them for their **Annual Earth Day Community Litter Clean-up** event, that will take place on April 19th, 2008. This year Adopt-A-Block will be hosting a clean-up of Centennial park and surrounding streets & area, including the leisure center grounds.

Adopt-A-Block's Earth Day Clean-Up is a fun activity that contributes to the health of the environment, the safety of our kids, and adds to the beauty of our city. What is more, being a part of a community clean-up is a great way to

April 22 is Earth Day!

enjoy the outdoors and get some exercise. All you have to do is show up! Adopt-A-Block will supply the equipment needed to participate (tongs, vests, bags) for those

that do not already have their own. Adopt-A-Block will be meeting at the west side parking lot of Centennial Park at 10:00am.

Join **Communities in Bloom** following the clean-up as they participate in an **Annual Earth Day Tree Planting**, in the south end of Centennial Park. Tree Planting starts at 12:30.

### Adopt-A-Block Computer Theft

Adopt-A-Block had the unfortunate experience of having the society's computer and modem stolen this past month. Adopt-A-Block purchased the new computer only this past year with the help of several grants obtained in 2007. The use of a computer is an essential component to the administration of Adopt-A-Block's

anti-litter program and the computer theft is unfortunate due to the large replacement cost for the non-profit. Adopt-A-Block is asking anyone who may have an old modem on hand if they might consider donating it to the society. Adopt-A-Block would also gladly accept the donation of an old computer to replace the one that was

stolen. Adopt-A-Block's tight 2008 budget does not allow for the funding of a new computer and the society is hoping to replace the computer in the near future. If you are able to help, please call (604) 826-9423.
